Art Unit: 2187

DETAILED ACTION

INFORMATION DISCLOSURE STATEMENT

1. The Applicant's submission of the IDS filed 11/25/2003 have been considered. As required by M.P.E.P. 609 C(2), a copy of the PTOL-1449 is attached to the instant office action. As required by M.P.E.P. 2001.06(b) and C.F.R 1.98(d) since the instant application has been identified as a continuation application of an earlier filed application No. 09/804221 (PN 6,658,523) and is relied upon for an earlier filing date under 35 U.S.C. 120, the Examiner has reviewed the prior art cited in the earlier related application as required by M.P.E.P 904, and as stated in M.P.E.P 2001.06(b) no separate citation of the same prior art need be made in the instant application.

In this instant application, claims 1-45 have been canceled, claims 46-52 have been added.

Terminal Disclaimer

2. The terminal disclaimer filed on 07/27/2004 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of PN 6,658,523 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Reasons for allowance

3. The primary reasons for allowance of claim 46 in the instant application is the combination with

the inclusion of the limitation of "setting said memory device to operate at a device read latency equal to said memory system read latency by adding a latency which is equal to a difference between said memory system read latency and a minimum device read latency of said memory device".

The primary reasons for allowance of claim 50 in the instant application is the combination with the inclusion of the limitation of "said memory device, in response to said latency command and said numeric value, is set to operate at a device read latency equal a minimum device read latency of said memory plus a number of clock cycles equal to said numeric value".

Because claims 47-49, 51-52 depend directly or indirectly on claims 46 and 50. These claims are considered allowable for at least the same reasons noted above.

Page 3

Conclusion

- 4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
 - a. Janzen et al PN 6,445,624 discloses method and system for controlling read latency using flag.
 - b. Rao PN 5,890,195 discloses minimizing delay access due to system clock.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ngoc Dinh whose telephone number is (703) 305-3023. The examiner can normally be reached on Monday-Friday 8:30 AM-5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Donald A. Sparks, can be reached on (703) 308-1756. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 746-7239 for regular communications and (703) 746-7238 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 305-3900.
